Riddle Corner:

1. By what process could you make a tea-table into food?
2. A poor but smart farmer is convicted for fraud against rich governor. He gets the death penalty for his crime. The judge allows him to say a last sentence in order to determine the way the penalty will be carried out. If the farmer lies, he will be hanged, if he speaks the truth he will be beheaded. The farmer speaks a last sentence and to everybody's surprise some minutes later he is set free because the judge cannot determine his penalty. What did the farmer say?
3. A man hijacks an airplane transporting both passengers and valuable cargo. After taking the cargo, the man demands two parachutes, puts one of them on, and jumps, leaving the other behind. Why did he want two?
